QW Series Submersible Sewage Draining Pump  
QW系列潜水排污泵

### 概述

QW 型系列无堵塞潜水排污泵是根据九五年国家专利技术生产的新型离心泵。该泵在设计上综合地吸收了瑞典科学的叶轮水力设计和西德合理的整体结构、快速的安装技术,以及日本完整的保护装置和先进的机械密封,效率高,能耗少、运行可靠。泵的性能、结构、安装尺寸和技术要求均符合中华人民共和国城乡建设行业标准,因此在国内排水排污行业得到了广泛的应用。

我公司生产的 QW 型无堵塞潜水排污泵,在原设计技术的基础上作了进一步改进,采用先进的微机计算机技术,实行水位自动控制、故障图型显示及保护,使其性能更可靠、使用更方便,更适合于多台泵的自动管理和无人看守时使用。

### General

QW series chokeless submersible sewage draining pump is new type centrifugal pump produced according to 1995 national patent technology. Pump design has absorbed Sweden scientific impeller water power design, German reasonable whole structure and quickly installing technology, Japanese perfect protective equipment and advanced mechanical seal. It is high efficiency, power saving, operates reliable. Performances, structure, installing dimension and technical requirements accord to China city and country construction industry standard, so it is widely used in draining water and draining sewage.

Our product has improved on original design technology, adopt advanced microcomputer technology, water level is autocontrolled, trouble map can show and be used more convenience, more suitable for several pumps auto management and no person watching.

Y型立式多级长轴泵  
Type YL Vertical Double-stages Long Shaft Pump

## 概述

YL 系列立式长轴泵，采用浸没式叶轮，立式安装。它具有结构紧凑，工作平稳，操作简单、维修方便、占地面积小；通用化、标准化程度高的优点。是我公司吸收了世界发达国家立式长轴泵设计和制造的先进经验，为适应我国市场需求研制和发展的先进成熟的系列产品。

该产品具有工业给排水；城市饮用水、生活消防及江、河湖、海取水等多种用途，适合冶金、矿山、化工、造纸、水电站等工业场所。

## 型号意义

① ② ③ - ④ ⑤ / ⑥

- 1 —— 泵吐出口径 (100~700)。单位 mm。
- 2 —— 立式长轴泵系列代号 YL。
- 3 —— 叶轮级数 (叶轮级数为 1 时略)。
- 4 —— 泵名义总扬程。单位: m。
- 5 —— 切割叶轮代号。以 A、B 示之。
- 6 —— 泵中间管数 N (0.1.2……, 中间管数为 1 时略)。

其中 1、2、3、4、5 为泵基本型号，6 为用户订货时按要求注明。

吐出口径 350mm 立式长轴泵，二级叶轮，总扬程 60 米，一次切割。

## General

Model YL vertical long shaft pump series adopts submerged blade wheel and vertical installation structure. It has merits of compact structure, stable running, easy operation, convenient maintenance, small ground space, high degree of versatility and standardization. It is an up-to-date mature product series researched and developed by our company on the basis of absorption of advanced experiences on design and manufacture of vertical long shaft in the developed countries with accommodation to the domestic market requirements.

The product has many applications including industrial water supply and drainage, tap water of city, living water and fire-fighting water, water pumping from river, lake and sea. It is used in industries of metallurgical, mine, chemical, papermaking, water power station, etc.

## Meaning of model code:

- 1 - Outlet port diameter of pump (100~700). Unit: mm.
- 2 - Code for YL vertical long shaft pump series.
- 3 - Stage number of blade wheel (it can be omitted when stage number of blade wheel is 1).
- 4 - Nominal total lift of pump. Unit: m.
- 5 - Code of cutting blade wheel. Shown as A, B.
- 6 - Pump middle pipe number N (0, 1, 2... it can be omitted when middle pipe number is 1).

Among them, 1, 2, 3, 4, 5 are the basic model code of pump. 6 must be declared when the user is placing his order.

Vertical long shaft pump with outlet port diameter of 350mm, 2-stage blade wheel, total lift of 60 m, and one time cutting.

FY Series Corrosive Vertical Submerged Pump

### 概述

FY 型耐腐蚀立式液下泵是一种单级单吸长轴式液下离心泵,其标记、额定性能点和法兰连接尺寸等效采用 ISO2858 国际标准、技术条件采用 ISO5199 标准。与原 FY 型耐腐蚀液下泵相比,具有体积小、效率高、节能效果好,运行可靠等优点。适用于输送稍含固体颗粒、磨料的腐蚀性介质。

泵的输送温度一般为  $0 \sim 105^{\circ}\text{C}$ 。温度在  $-20 \sim 0^{\circ}\text{C}$ 、 $105 \sim 180^{\circ}\text{C}$  时可采用保温夹套及冷却夹套,采用低温或高温耐磨导轴承,此类情况用户应说明。

如输送介质有少量固体颗粒,滑动轴承应采用外润滑方式(外接压力大于  $0.2\text{MPa}$  的清水和其它允许的介质),此类情况用户应说明。

泵的工作压力按  $1.6\text{MPa}$  设计。

泵的性能范围:流量为  $1.6 \sim 2600\text{m}^3/\text{h}$ ,扬程为  $5 \sim 132\text{m}$ 。

根据所输送介质的不同,FY 型立式液下泵接触液体部分的材质可选用铸铁(用符号 H 表示)、铸钢、 $1\text{Cr}18\text{Ni}9\text{Ti}$ (用符号 B 表示)、 $1\text{Cr}18\text{Ni}12\text{Mo}2\text{Ti}$ (用符号 M 表示)、301、304L、316、316L、904、Lewmet 合金、20 号合金等材料制造。

### General

FY series corrosive vertical submerged pump is one of single-stage single-suction long-shaft submerged centrifugal pumps. Its marks, performance points and dimension of flange are designed according to International Standard of ISO2858. Its technical conditions are designed according to ISO5199. It has little volume, high efficiency, power saving, operating liability compared with former FY series corrosive vertical submerged pump. It can not pump corrosive medium which has solid particles and wearable materials.

The medium temperature varies from  $0^{\circ}\text{C}$  to  $105^{\circ}\text{C}$ . Heat preservation closed cover and low-temperature wearable guide bearing are used when the temperature of medium is from  $-20^{\circ}\text{C}$  to  $0^{\circ}\text{C}$ , cooling closed cover and high-temperature wearable guide bearing are used when the temperature of medium is from  $105^{\circ}\text{C}$  to  $180^{\circ}\text{C}$ . This condition must be stated when ordering.

If medium has little solid particle, sliding bearing should be outer-lubricated bearing, which shall be stated clearly when ordering (water and other allowed medium whose outer pressure is over  $0.2\text{MPa}$ ).

Operating pressure is designed at  $1.6\text{MPa}$ .

Performance range: Capacity:  $1.6 \sim 2600\text{m}^3/\text{h}$ , head:  $5 \sim 132\text{m}$ .

The materials contacting with liquid can be selected as cast iron (H), cast steel,  $1\text{Cr}18\text{Ni}9\text{Ti}$  (B),  $1\text{Cr}18\text{Ni}12\text{Mo}2\text{Ti}$  (M), 304, 304L, 306, 306L, 904, Lewmet Alloy, 20 # Alloy according to different medium.

说明: 1、大于等于 200kw 电机根据用户要求可以选择 380V、6000V 电机, 具体型号根据用户要求选择。

2、表中电机型号仅供参考, 用户可以根据要求选择同等功率的电机, 电机可以是防爆或不防爆的。

Notice: 1. For motor with of 200kw or above, we can choose 380V or 6000V motors as per your requirements. The actual mode will be the user's option.

2. The motor models listed in the table are for reference only. The user can choose equivalent motor. The motor can be explosion proof type or not explosion proof type.

PUMP AND VALVE SERIES PRODUCTS

FYSM 型液下泵  
FYSM Series Submerged Pump

## 概述

FYSM 型系列化工液下泵是立式单级单吸离心泵。用于输送含有固体颗粒和不易结晶的有腐蚀液体。被输送介质温度 -20℃ - 150℃。特殊需要时可为 -50℃ - 150℃。液下泵工作部分淹没在液体内,轴封无泄漏现象。且占地面积小,使用可靠,维修方便,耐腐蚀性能强等特点。广泛适用于化工、石油等工业部门。

## General

FYSM serial chemical submerged single - priming, single - stage centrifugal pump can be used to deliver corrosive liquid containing solid particle under the temperature -20℃ ~ 150℃ ( -50℃ ~ 150℃ under special circumstance) . Operation section of submerged pump is partially immersed the liquid without leakage of the shaft seal. Because of the features that small occupied space, reliable usage, convenient maintenance and strong corrosive resistance, this serial pump can be widely used in the fields of chemical industry and petroleum.

注: 1、表列数据是常温时清水的性能,选用时按实际换算。2、液下深度(也称接管长度)。根据用户自选。

Note: 1) The values shown in the table indicate the characters of clean water at normal temperature.

2) The depth under liquid can be determined by customers.

### 概述

HYF 型系列化工液下泵是立式单级单吸离心泵。用于输送不含固体颗粒和不易结晶的有腐蚀性液体(特殊定制可输送微量结晶液体)。被输送介质温度 -20℃ ~ 200℃。液下泵工作部分淹没在液体内,轴封无泄漏现象。且占地面积小,使用可靠,维修方便,耐腐蚀性能强等特点。广泛适用于化工、制药、造纸、石油等工业部门。

### General

HYF series chemical submersible pump is vertical single-stage single-suction centrifugal pump. It is used in transporting containing no solid grain no crystal corrosive liquids(it can transport tiny crystal liquids for special made) whose temperature is from -20℃ to 200℃. The operating parts are submerged in liquids, shaft seal has no leakage. It has advantages such as small area, liable usage, convenience repair, strong anti-corrosive. It is widely used in chemical, medical and petro-chemical industry.

PUMP AND VALVE SERIES PRODUCTS

## 概述

LJYA 系列料浆泵为单级单吸立式悬臂式离心液下泵。叶轮为半开式，叶轮前后均配有耐磨盖，广泛应用于化工流程输送含 30% 以下固体颗粒，粘度低于 200CP 的磨、腐蚀交互作用的介质。特别适用于磷肥工业中输送磷酸、磷铵料浆等介质。

输送介质一般低于 110°C。如需输送更高温度的介质，应考虑用冷却水冷却轴承。

性能范围：流量  $Q = 10 \sim 400 \text{m}^3/\text{h}$  扬程  $H = 5 \sim 50 \text{m}$ 。

FLX 型系列料浆循环泵为 3~100 万/吨年磷铵工程中的一效二效料浆蒸发浓缩循环的重要配套设备，该泵具有效率高、汽蚀性能好等特点，是取代进口设备的优选产品。该系列泵同时广泛应用于化工、石油、冶金、造纸等其它工业部门。

## Summary

Model LJYA series slurry pump is a vertical cantilever – type single – stage – single – suction centrifugal submerged pump. Its blade wheel is a semi – open type. In the front and back of the blade wheel installs an abrasio – resistant cover. The pump is widely used in chemical process for conveying medium containing less than 30% solid granules and with viscosity less than 200cp, which is subject to the interaction of corrosion and abrasion. It is especially suitable for conveying such medium as phosphoric acid, triammonium phosphate slurry, etc. In general, the teperature of the conveying medium is less than 110°C. When conveying medium with higher temperature, the bearing should be cooled with cooling water. Performance scope: flow  $Q = 10 \sim 400 \text{m}^3/\text{h}$  Lift  $H = 5 \sim 50 \text{m}$

The FLX type series anticipates the syrup circulates to pump to 3~1000000/ year in ton phosphorus ammonium engineering in side of an effect two effects anticipates syrup evaporate concentrated circulate of inportant kit Equipments, should pump to have efficient and high, vapor eclipse function good etc. Characteristics, is Replace the ptimization product that imort the equipments. That series pump is extensive at the same time should Used for the other industry in chemical engineering, petroleum, metallurgy, deckle... etc. Sectopm.

## 主要制造材料及适用介质：

### Main manufacture materials and applicable nedium.

代号 Code	适用介质 Applicable medium
CW – 2(CD4MCu)	适用于稀硫酸、湿法磷酸、磷铵料浆、有色冶金电解液 suitable for diluted sulfuric acid, phosphoric acid by wet process, triammonium phosphate slurry, electrolyte of metllurgy of non – fcrrous metals
904、UB – 6	适用于稀硫酸介质 Suitable for diluted sulfuric acid
CB7Cu	弱腐蚀性砂浆、渣浆及钾肥生产中的光卤石、卤水 Weak corrosive sand slurry, slag slurry, as well as the carnallite and halogen liquid in the production of potassium fertilixers.
316、Mo2Ti	稀硝酸、磷酸、有机酸及含少量硫酸根、氯离子的介质 Diluted nitric acid, phosphoric acid, organic acid and medium containing smal amount of sulfuric acid or chlorion
304、18 – 8	稀硝酸、有机酸 Dilutcd nitric acid, organic acids.

除上述材料外，亦可根据用户需要选用其它材料制造。

Besides the above materials, other manufacture materials can also be chosen according to user's need.

## LSB系列高温浓硫酸液下泵 LSB Series High-Temperature Vitriol Pump

### 概述

为适应硫酸生产技术发展的需要，我公司与中国科学院金属研究所、上海交通大学、江苏理工大学一起研制开发了 LSB 系列浓硫酸液下泵，并在若干硫酸厂获得了成功应用，LSB 系列浓硫酸泵具有下列特点：

- 1、研制和选择泵的优秀水力模型，使运转性能稳定，并且高效节能。
- 2、研制和采用国内最先进的耐腐材料，过流部件采用 XY - 21、XY - 31 合金制造，其余部位采用特种耐蚀铸铁制造，使泵的使用寿命进一步加长。
- 3、广泛吸取国内外硫酸泵结构设计的长处，增加吸入管长度；使泵组的刚性提高、运转平稳可靠。
- 4、本系列泵标准化、通用化程度高、互换性好、拆装维护方便。

### General

In order to adapt the development requirement of vitriol produce technology, we have empowered LSB series thick vitriol submersible pump with Metal Graduate School of Chinese Academy of Sciences, Shanghai University of Communication and Jiangsu University. And they are successfully applied in several vitriol factories. They have the following characteristics:

1. Select pump excellent water power model, whose performance stable, high efficiency, saving power.
2. Use national advanced coorsive materials, the parts liquids passed are made up of XY - 21 and XY - 31 alloys. The rest are made up of special corrosive casting iron, which made pump life lengthen.
3. Widely absorbed the advantages of national and international structure design of vitriol pump, lengthen the length of suction pipe, which advances the rigidity of multi cell pump, pump operates level and reliable.
4. This series pump is high standard and high universal, changeable, convenience assemble, disassemble and repair.

### 概述

GY 型系列高温熔盐液下泵，是我公司在多年生产的 RY 型熔盐泵基础上根据用户的需要，参考国外同类型产品的结构进行开发设计的 RY 型升级换代产品。

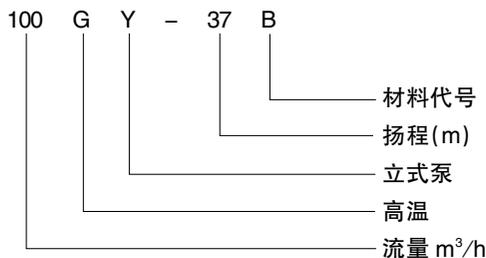

GY 系列较替代产品 RY 型熔盐泵产品系列更完善，使用寿命更长，并从单一的熔盐输送，进而转化为除熔盐外，同时可作为高温化工物料的输送，**介质使用温度 < 540℃**。

GY 系列在设计上充分考虑了传动部位的冷却，输送介质饱和和蒸汽的密封等工况条件，对原 RY 型泵结构作了大量的改进并通过试验进行验证；

- 1、轴承部位设有冷却装置，使轴承工作环境不受高温介质的影响。
- 2、冷却水与轴直接接触，介质的**高温不会因轴而传递到转动部份**。
- 3、独特的结构，确保冷却水绝对不进入介质。
- 4、无须维修耐高温的密封装置，使被输送介质的饱和蒸汽不致于逸出，（特别在输送熔融盐的工况，即使少量的亚硝酸盐饱和蒸汽也对人体有害，致癌。）

多种耐高温、耐腐蚀耐磨材料的组合，使 GY 系列高温液下泵不但适用于如：膜式法固碱，有机氟裂解使用的二元、三元组份的熔盐，也可使用于磷肥、石油裂解等装置的高温流体输送。由于彻底杜绝了热量传至传动部位，因此 GY 系列泵较同类型高温液下泵（熔盐泵）寿命大大提高。

### 型号意义

### General

Next pump in liquid in fusil hydrochloric in series heat in GY type, is RY my factory to produce at many year in the type fusil hydrochloric pump foundation according to the demand of the customer, consult abroad of the same kind type product of The construction proceeds the RY type that develop the design promotes to higher grade to change the on behalf product.

The series of GY than act for the product RY type fusil hydrochloric pump product line more perfect. The service life is more long. combining to transport from the single the salt of fusilth, then converting in to divided by the fusil hydrochloric Salt outside, can be used as at the same time the heat chemical engineering material transport.

The series of GY considers to spread the cooling that move the part well on the design, transporting Lying the saturated steam in quality seals completely to wait the work circumstances term, making to the original RY type pump construction A flood of improvement and pass to experiment the proceeding verification:

1. the bearings part establishes the cooling device, making bearings work environment not summit to and high The temperature lies the influence of the quality.
2. cool off the water to get in touch with stalk directly, lie the heat of the quality can't spread because of stalk Pass to turn to move the part.
3. special construction, insure cooling water absoluteness not enter to lie the quality.
4. need not to maintain to bear the heat seal completely the device, making is transported to lie the quality satisfied Divert unlikely with the steam, (special at work circumstances that transport the meltdown salt, even The saturated steam in a little amount and second nitrate also is harmful to the human body, cancer - causing.)

The variety bears the heat and bear the corrosion bears the combination that what the material, making next pump in GY series heat liquid been applicable to not only such as: film type method solid alkali, the organism fluorin break lies two dollars, three dollar a heat for of the fusil hydrochloric, and also can using in phosphate fertilizer, petroleum break solution etc. device fluid of the usage transports. Because eradicating completely thoroughly the calories spreads to spread to move the part, for this reason GY series pump than the next pump (fusil hydrochloric pump) in liquid in heat in type in of the same kind life span increases consumedly.

### Meaning of model code

B - Material code number      37 - capacity (m)  
Y - upright pump                  G - heat      100 - head m<sup>3</sup>/h

### PNL系列泥浆泵 Model PNL Slurry Pump

### 概述

PNL 型泵为立式单级单吸泥浆泵，适用于输送含固体颗粒的液体，广泛适用在火电厂水力除灰，选矿厂精矿，尾矿输送领域，输送最大重量浓度为 50 – 60%。

### Brief Introduction

Type PNL pump is vertical single – stage and single – suction dredge pump, which applies to pump the liquid containing solid particle, such as ash removing by waterpower for thermal power factory, concentrate for ore dressing plant. The max. weight concentration is 50 – 60% .

# 泵阀系列产品

PUMP AND VALVE SERIES PRODUCTS

KCB、2CY型  
齿轮式输油泵

## 概述

本泵适用于输送各种有润滑体的液体，温度不高于70℃，如需高温200℃，同本单位联系可配用耐高温材料即可，粘度为 $5 \times 10^{-5} \sim 1.5 \times 10^{-3} \text{m}^2/\text{s}$ 。本泵不适用于输送腐蚀性的、含硬质颗粒或纤维的、高度挥发或闪点低的液体，如汽油、苯等。

## 型号意义

## Summary

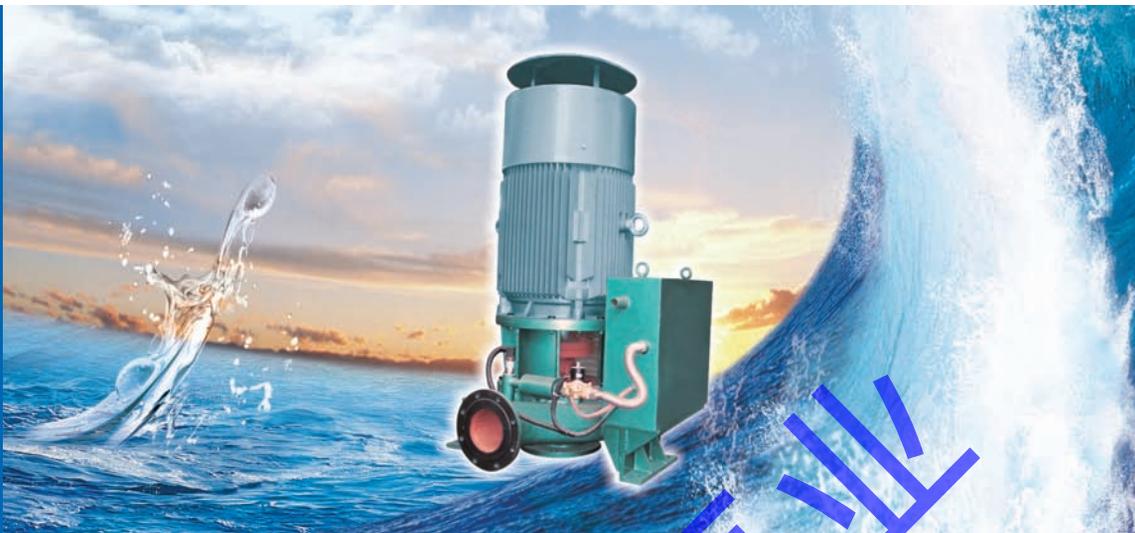

The pump is appropriate to convey diverse lubricants with temperature less than 70℃, if temperature up to 200℃ required, heat resistant material has to be matched with viscosity  $5 \times 10^{-5} \sim 1.5 \times 10^{-3} \text{m}^2/\text{s}$ . This pump is inappropriate to convey corrosive, volatile and low flash point liquid with solid particle or fiber contained, as gasoline, benzene.

GLB(GJB)系列高效节能自控自吸泵  
GLB(GJB) series of self-priming pumps

### 概述

GLB(GJB)系列高效节能自控自吸泵是我公司积极响应并贯彻执行国家节能减排的方针和产业政策，并适应市场需要，联合中国科学院、江苏理工大学流体机械研究所、上海水泵研究所等科研部门共同研制开发的一种新型高效节能新产品。

#### 产品原理：

GLB(GJB)系列自吸泵是我公司在普通自吸泵的基础上优化升级，并设计增加智能自控装置研制而成的一种新型高效节能具有国际先进水平的优特产品。工作时该水泵能迅速将吸管内或介质中析出的气体与输送介质分离，从水泵的蜗壳内快速排出，在智能装置的作用下，水泵启动后立即出水，能够使水泵达到排气与出水同步工作。

#### 产品用途：

GLB(GJB)系列高效节能自吸泵是长轴液下泵、立式长轴泵、潜污泵、普通自吸泵及卧式离心泵的理想替代产品，该产品广泛适用于钢铁、化工、石油、电力、冶金、环保、建筑、污水处理、制药，自来水等领域，因独特的叶轮结构和无须引流的自吸功能，可输送各种浓度的酸、碱、盐、废水及污水等介质，并可根据用户不同的介质及工况要求进行特殊材质设计、生产、制造。

### 型号意义

100 GLB(GJB) - B3

性能参数代码	Performance parameter code
高效节能自吸泵	High-efficiency energy-saving self-priming pump
泵进口口径DN100	Pump inlet caliber DN100

### General

GLB (GJB) series of self-priming pumps with high efficiency, energy saving and self-control are a new type of high efficiency and energy saving pumps developed by our company in conjunction with the scientific research departments of the Chinese Academy of Sciences, the Institute of Fluid Machinery of Jiangsu University of Technology and the Shanghai Pump Research Institute. The product has won the national utility model patent.

#### Product principle:

GLB (GJB) series self-priming pump is a new type of high-efficiency, energy-saving and international advanced product developed by our company on the basis of ordinary self-priming pump optimization and upgrading, and design and increase intelligent self-control device. When working, the pump can quickly separate the gas released from the suction pipe or medium from the conveying medium, and expel it from the volute of the pump. Under the action of intelligent device, the pump can discharge water immediately after starting, so that the pump can work synchronously with the exhaust and outlet.

#### Product uses:

GLB (GJB) series high-efficiency energy-saving Self-priming pumps are ideal substitutes for long-axis submerged pumps, vertical long-axis pumps, submersible sewage pumps, ordinary Self-priming pumps and horizontal centrifugal pumps. They are widely used in iron and steel, chemical industry, petroleum, power, metallurgy, environmental protection, construction, sewage treatment, pharmaceuticals, tap water and other fields due to their unique impeller structure. Without the self-priming function of drainage, it can transport various concentrations of acid, alkali, salt, waste water and sewage, and can design, produce and manufacture special materials according to different media and working conditions of users.
